# MICRO PLUS: soundproofing dedicated to contemporary aesthetics.

The **MICRO PLUS** acoustic panel from CBI Europe is designed for use in false ceilings and counter walls in environments where the need to effectively and accurately control sound absorption and environmental reverberation is combined with the demand for unformed and continuous surfaces: theatres, auditoriums, museums, meeting rooms, conference rooms, offices, etc..

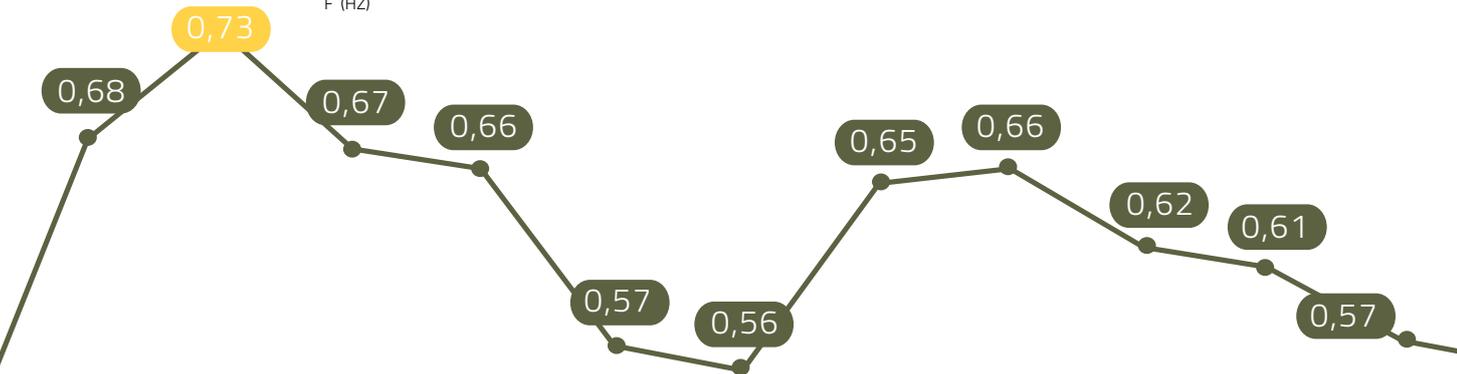

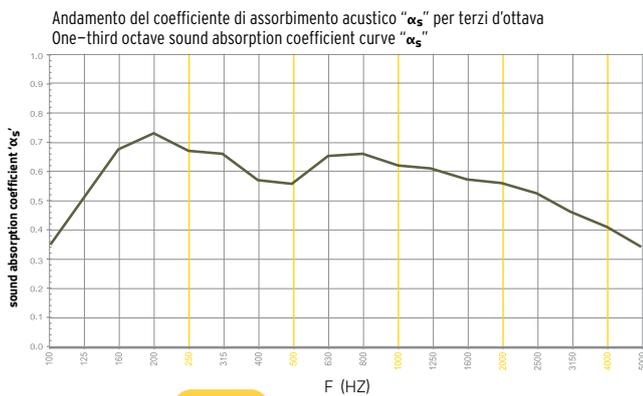

The result is guaranteed by the panel's micro-drilling, which is invisible even from a short distance thanks to the very small size of the hole ( $\varnothing$  0.5 mm) combined with the body of the panel made of high-density MDF, perforated and covered with sound-absorbing fabric.

designed for  
**THEATRES**  
**MUSEUMS**  
**AUDITORIUMS**  
**MEETING ROOMS**  
**CONFERENCE ROOMS**  
**OFFICES**
